IT Technical Support Engineer / Network Engineer with over 3 years of hands-on experience providing Level 2 IT support across enterprise campus, retail, and manufacturing-style environments. Strong background in end-user support, Windows endpoints, Microsoft 365, Intune, Entra ID, Active Directory, DNS/DHCP, Wi-Fi, firewall, ServiceNow ticket handling, asset records, SOP documentation, vendor escalation, and IT project support. Microsoft-certified across Microsoft 365, Endpoint Administration, Azure Administration, and Azure Network Engineering, with a practical support mindset focused on SLA, root cause analysis, service reliability, and user experience.

Experience

Network Engineer

Jul 2024 - Present

RMIT University Vietnam | Full-time onsite, contracted via CMC Technology & Solution

Ho Chi Minh City,
Vietnam

Operate enterprise campus and data center network services while supporting incidents, changes, documentation, vendors, and user-impacting service restoration.

- **Enterprise Network & IT Operations:** Operate and troubleshoot production campus and data center environments supporting thousands of staff and students, with day-to-day ownership across incidents, change support, documentation, and vendor coordination.
- **L2 Troubleshooting & Root Cause:** Investigate issues across VLANs, routing, switching, Wi-Fi, VPN, firewall policies, DNS/DHCP dependencies, service availability, and endpoint/network handoff points instead of stopping at temporary workarounds.
- **Cisco, Aruba & Palo Alto Administration:** Administer and validate Cisco ISR/Catalyst/Nexus, Aruba switches/APs/controllers, and Palo Alto platforms, including configuration checks, incident evidence collection, and escalation to senior engineers or vendor support.
- **ITSM, SLA & User Communication:** Use ServiceNow to manage incidents, capture troubleshooting evidence, communicate with users and internal teams, prioritize service impact, and follow through until services are restored.
- **Network Segmentation Support:** Supported VLAN redesign and firewall policy validation to separate critical systems, reduce attack surface, and improve operational control across campus services.
- **Data Centre Relocation & Technology Uplift:** Contributed to staged migration planning, configuration checks, cutover support, rollback awareness, and post-change validation to reduce service disruption during infrastructure changes.
- **Documentation & Operational Readiness:** Maintain network diagrams, SOPs, operational notes, troubleshooting records, and handover information so recurring issues can be resolved faster by the wider IT team.

Network Engineer

Jan 2023 - Jul 2024

NTT DATA Corporation | Full-time onsite, contracted via Unitek International Co., Ltd

Ho Chi Minh City,
Vietnam

Delivered implementation and support services for enterprise clients in retail and manufacturing, covering staging, deployment, troubleshooting, handover, and business coordination.

- **Retail & Manufacturing IT Delivery:** Supported enterprise client environments where site uptime, opening deadlines, ISP coordination, device readiness, and clear handover documentation were critical to business operations.
- **Firewall, Switching & Network Services:** Configured and supported Fortinet firewalls, Cisco switches, and Aruba switches; handled NAT, DHCP, VPN, load balancing, VLANs, firewall policies, and basic server/network service dependencies.
- **Asset & Device Lifecycle Support:** Supported endpoint/network device preparation, asset records, handover documentation, warranty/vendor coordination, and operational tracking to maintain accurate IT inventory and service readiness.
- **Store Network Rollouts:** Implemented complete store networks for Uniqlo Vietnam locations and Matsumoto Kiyoshi, coordinating with ISPs, vendors, site teams, and project stakeholders to meet strict opening deadlines.
- **Office Network Migrations:** Supported Honda Vietnam Power Products and Kobelco Eco-Solutions migration activities, including IP/VLAN planning, firewall policy migration, cutover support, and post-migration checks.
- **Wireless Deployment & Validation:** Deployed Aruba wireless solutions and used Ekahau site survey outputs to validate coverage, improve user connectivity experience, and reduce post-deployment Wi-Fi issues.
- **Server, Backup & Asset Handover:** Supported Dell/HP/IBM hardware, NAS, RAID, Veeam/Veritas, and Active Directory-related replacement work, including onsite checks and handover notes for enterprise clients.

Projects

Network Segmentation & Firewall Policy Validation | *Network Engineer*2024 - 2025

Supported an enterprise segmentation initiative to strengthen security boundaries and improve control over critical systems in a large campus environment.

- **VLAN & Policy Validation:** Helped validate VLAN redesign, firewall rules, and service reachability to ensure users and systems could still access required services after segmentation changes.
- **Operational Evidence:** Captured pre-change and post-change checks, screenshots, test results, and troubleshooting notes to support change records, incident response, and future handover.
- **Business Impact:** Reduced the risk of unauthorized lateral access while helping maintain service continuity for staff, students, and business-critical systems.

Data Centre Relocation & Network Technology Uplift | *Network Engineer*2024 - 2025

Contributed to staged migration and infrastructure uplift activities requiring careful planning, cutover support, and post-change validation.

- **Migration Readiness:** Assisted with configuration checks, dependency review, connectivity validation, and operational notes before planned migration windows.
- **Cutover & Post-Change Support:** Supported service restoration checks after cutover, verified network paths and application reachability, and helped escalate complex issues when vendor or senior engineering input was required.

Retail Store Network Rollouts - Uniqlo Vietnam & Matsumoto Kiyoshi | *Implementation Engineer*2023 - 2024

Delivered store network implementation activities in deadline-driven retail environments where business opening dates depended on stable connectivity.

- **End-to-End Site Delivery:** Prepared and deployed firewall/switch/Wi-Fi configurations, coordinated with ISP and site teams, validated connectivity, and documented handover items for operations.
- **Troubleshooting Under Time Pressure:** Resolved onsite issues involving IP addressing, VLANs, DHCP, NAT, VPN, WAN reachability, and wireless connectivity to keep project timelines on track.

Office Network Migration - Honda Vietnam & Kobelco Eco-Solutions | *Network Implementation Support*2023 - 2024

Supported enterprise office migration work involving IP/VLAN planning, firewall policy migration, and post-migration service checks.

- **Change Execution Support:** Helped prepare migration plans, validate configurations, support cutover activities, and confirm user/service access after the migration.
- **Handover Discipline:** Documented network parameters, troubleshooting findings, and operational notes so support teams could maintain the environment after project completion.

Certifications

- **Microsoft 365 Certified: Administrator Expert (MS-102)**2026 [\[View proof\]](#)
- **Microsoft 365 Certified: Endpoint Administrator Associate (MD-102)**2026 [\[View proof\]](#)
- **Microsoft Certified: Azure Administrator Associate (AZ-104)**2026 [\[View proof\]](#)
- **Microsoft Certified: Azure Network Engineer Associate (AZ-700)**2026 [\[View proof\]](#)
- **Cisco Certified Network Associate (CCNA 200-301)**
- **Microsoft Certified Solutions Associate (MCSA) - Windows Server**

Education

Bachelor of Information TechnologyExpected Dec 2026

*University of Information Technology (UIT), VNU-HCM*Vietnam

Diploma, Network Security & System ManagementAug 2020 – June 2022

*FPT Jetking - International Cybersecurity Training System*Vietnam
